## Support and training

by Lazlo Gaspar (HU), Elo Mandel (EE), Martin Tais (BA),  
Nataliya Kasymova (UZ), Martin Adams (ETC-ACC),  
Vigdís Vestreng, MSC-W

CBWS, Rovaniemi 17-18. Oct. 2005

# OUTLINE

- The group 3 presentation
- Information about reporting?
- Reporting tools
- Guidebook obstacles?
- WS and expert visits - main themes

# Overview

- HU, EE: Report emissions
- BA: Political problems (institutional soon to be solved)
- UZ: Wish to join the Convention in 2006??

# Support

- Sufficient information about how to report
- **CollectER**: EE, BA (Copert for transport)
- HU: Not sufficient detailed input data to use CollectER, but report on aggregated levels
- EE: Found Collector limited by pollutants
- BA: Have data but institutional / political obstacles. New EMEP station (O<sub>3</sub>, +++++). Send data to AIRBASE etc.
- UZ will join CLRTAP; 70 station to AQ control; Pb inventory. Starting
- Otherwise no particular problems raised

# Wish list - GUIDEBOOK

- Guidebook well known and used
- HU: Emission factors for gas engines (RU gas)
- Include rule of thumb calculation of activity data in guidebook, Industrial processes, transport (detailed data)
- Tables comparing emission factors from different sources. OVERVIEWS! Explanation on differences (factor 10 differences seen, transport/ combustion)  
Between in m<sup>3</sup> (E.G m<sup>3</sup> glass) and EFs pr tonnes

# Training

- How to do estimates of activity data?  
Not enough statistical data
- WS - EXPERT VISITS? Human resources, lack of interest from politicians. No proposals
- More difficult POLLUTANTS?? NO

# YOU

- Reporting obstacles?
- Guidebook? **How to use EFs**
- **WS? HM, POP, PM**
- Expert visits?
