

Task Force on Emission Inventories and Projections

This Years' Activities and Future Work

TFEIP co-chairs: Chris Dore, Martin Adams and Kristina Saarinen

Contents

1. Review of 2016-2017 Workplan

- Core programme, Admin, Development

Work for 2017 & Onwards

2. Core programme
3. Technical Review of Inventories
4. Guidebook Development
5. PM: Condensables/SVOCs
6. Black Carbon

1. Review of 2016-2017 Workplan

Core Programme

1. On-going technical support/co-ordination
2. Annual TFEIP/EIONET Meeting (& workshop)
3. Communications and outreach

Administration

4. Updated Review (Methods & Procedures Document)
5. Updated Mandate

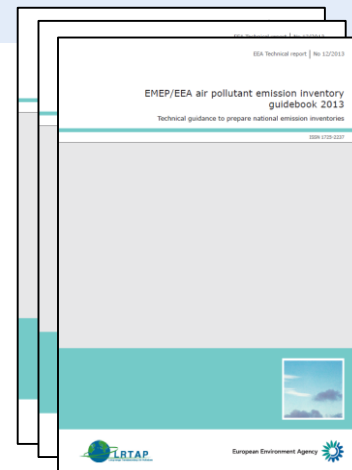

1. Review of 2016-2017 Workplan

Development

6. Updated EMEP/EEA Guidebook

- Successful update of Guidebook in 2016.
- TFEIP, EC (DG Env, Clima), EEA, Germany
Denmark, CONCAWE, Eurocontrol, Eurometaux, European Aluminium
- No funding for current/future work... EMEP core budget?

7. Condensables/Semi-volatiles

- No significant contribution to TFMM's work.
- Questionnaire issued to Parties... but no follow up!

Work Programme for 2017 & Onwards

2. Core Programme

TFEIP 2017 (25th Anniversary)

- 10-12th May, Krakow, Poland
- EECCA Session
- Workshop on uncertainties & QA/QC

TFEIP

2. Technical Review of Emission Inventories

Technical Corrections

- Guidance document required... before May 2017

NECD Reviews

- Slightly different approaches being developed
- Need to ensure alignment between NECD & CLRTAP reviews as far as possible.
- The “new” approach to CLRTAP reviews will drive improvements in inventories.

3. Guidebook Development

Long-term goal:

Secure annual budget/funding for the Guidebook

Priority Issues for EMEP Budget:

Agriculture NH_3 from Livestock

- Review NH_3 EFs for livestock & manure management

Wood and Small-scale Combustion

- Further review of literature to provide updates to various sources in the Guidebook (including BC).

4. Condensables/SVOC

- **Short-term targets**
 - TFMM to update technical paper (done just before this meeting)
 - Challenges & solutions, summary of Guidebook information, practicalities of extending Guidebook content.
- **Long-term aims**
 - Standardise reporting (sector specific inclusion/exclusion?)
 - Research needed to better understand emissions of the organic component of PM.

5. Black Carbon

- **Short-term**

- Clarify with EMEP the priority level of work on BC
- Review the national emissions inventories currently available (in and outside EMEP)
- Recommendations for improvements to GB and inventories

- **Broader questions**

- There are calls for EMEP to compile technical information that would complement the Guidebook:
 - EFs for countries outside the EMEP region
 - Fine timescale emissions guidance
 - Etc.
- All of the above would require funding... from somewhere!

Summary

Core programme OK

- Trying to support TFMM on Condensables

Requesting funds for:

- Agriculture NH_3 EFs
- Wood Combustion EFs

Discussion today/tomorrow:

- Regular funding for the Guidebook?
- Who should fund BC work?
- We are being “encouraged” to draft guidance to complement the Guidebook.

Expert Panels

**Combustion
& Industry**

Transport

**Agriculture &
Nature (306)**
